SUMMARY

Mobile engineer with 3 years building cross-platform Flutter applications for fintech, logistics and e-commerce, including two years working remotely with teams in the United States and Canada. Shipped six apps to the App Store and Play Store, one of them passing 500k downloads across three markets. Comfortable owning a feature end to end: architecture, payment and API integration, offline behaviour, and release management on both stores.

EXPERIENCE

SlickPay

Mobile Application Developer

Feb 2026 – Present

Algiers, Algeria · Remote

- Develop and maintain the SlickPay wallet app in Flutter, covering QR-code payments, peer-to-peer transfers, mobile top-up and bill payment.
- Implement card payment flows against the internal payment API, handling transaction states, retries and failure paths.
- Maintain build and release pipelines for iOS and Android, from signing and versioning through distribution to both stores.
- Ensure each release meets App Store and Play Store review requirements for a financial application.

CAMIO LLC

Mobile Application Developer

Jun 2024 – Feb 2026

Dover, Delaware, USA · Remote

- Built and maintained the company's Flutter logistics app across three markets — Algeria, Morocco and Egypt — reaching over 500,000 downloads.
- Integrated three payment providers (Stripe, Payzone and SATIM) to cover both international cards and Algerian domestic schemes within a single checkout flow.
- Collaborated on a machine learning model estimating cargo trip costs from historical trip data and market variables, integrated into the company's system.
- Owned release management for iOS and Android, with CI/CD pipelines on Azure DevOps and Codemagic.
- Worked across timezones with product managers, designers and backend engineers on a fully remote US team.

DelivriLi

Mobile Developer (Part-time)

Dec 2023 – Aug 2024

Médéa, Algeria · Hybrid

- Developed cross-platform delivery applications in Flutter and Dart with REST API integration.
- Translated Figma designs into responsive interfaces consistent across iOS and Android.
- Restructured the codebase around a layered architecture to make feature work maintainable as the team grew.

SELECTED PROJECTS

SolvGo

Freelance · Field service management

▶ Play Store · 📱 App Store

- Built a field service platform covering the full job lifecycle: quoting, scheduling, invoicing and payment collection.
- Implemented job assignment and real-time progress tracking so dispatchers and technicians stay in sync from planning to delivery.

Find Eat & Find Eat Business

9530-0869 Quebec Inc · Local deals ecosystem

Consumer: 📱 App Store · ▶ Play Store

Business: 📱 App Store · ▶ Play Store

- Shipped a two-app ecosystem: a consumer app for location-based deal discovery with QR redemption, and a merchant dashboard for managing promotions and tracking redemption metrics.

- Built the QR scan-and-redeem loop connecting both apps, and subscription-gated access for merchant accounts.
- Delivered for a Quebec-based client, working in French with non-technical stakeholders.

3amar 7anoutek

▶ Play Store · 📱 App Store

Freelance · E-commerce

- Built a full e-commerce app with catalogue browsing, search, secure checkout and order tracking.
- Implemented product recommendations and inventory-aware listings in an Arabic-first interface.

Pharma Express

▶ Play Store · 📱 App Store (in review)

Part-time · Pharmacy availability and medication reminders

- Rebuilt an app that lets users find which nearby pharmacies stock a given medicine, using location-based search and map integration.
- Implemented medication reminders with scheduled local notifications for recurring doses.
- Contributed to feature scoping with stakeholders, then owned the release: Play Store deployment and App Store submission, including production launch preparation.

EDUCATION

Université Yahia Farès de Médéa

Sep 2023 – Jun 2025

Master's degree, Applied Artificial Intelligence

Médéa, Algeria

- Thesis, in collaboration with CAMIO: a cost estimation model for cargo trips trained on the company's historical trip data and market variables, deployed into their production system.

Université Yahia Farès de Médéa

Sep 2020 – Jun 2023

Licence, Information Systems

Médéa, Algeria

SKILLS

Mobile: Flutter, Dart, cross-platform iOS and Android

State Management: BLoC, Provider, GetX

Payments: Stripe, Payzone, SATIM, CIB and Edahabia card flows, QR payments

Backend & Integrations: REST APIs, Firebase (Auth, Firestore, Analytics, Crashlytics, Remote Config, FCM), Google Maps, Social Auth (Google, Apple, Facebook)

Data & Offline: SQLite, Hive, offline-first sync, secure local storage

CI/CD & Tooling: Git, GitHub, GitLab CI, Azure DevOps Pipelines, Codemagic, App Store and Play Store release management

Design: Figma, Material Design, Cupertino guidelines

Languages: Arabic (native), English (fluent), French (advanced)
